

SUMMER SEWER USAGE POLICY

A resident of City of Rice Lake's municipal sewer system can apply for a summer sewer billing reduction under the following conditions:

- Home must be a owner occupied single family residence
- An application must be completed for summer sewer usage policy
- The home must have been occupied for the previous twelve months – “snowbirds” will not qualify.
- Must have metered water readings and be invoiced during all the previous twelve months.
- Account must be paid up to date
- The months of June, July, and August are the only months the usage reduction policy will apply.
- The average water usage must be greater than the minimum (1,000 gal.)
- The customer sewer usage will be billed the lower of the average seven month water usage or actual water usage whichever is lower.
- Usage calculations will be determined by using October thru April usage and dividing by seven. This is the amount that will invoice for June, July, and Aug.
- Customer will need to apply annually.
- Policy may be revoked at any time at the discretion of the City Council.
